Smart Order Pick-Up Cabinets

CARTER-HOFFMANN ®

Pick-Up Cabinet System Overview

PUC is a smart & connected equipment solution for order pick-up programs offering:
- Speed of service
- Streamlined pick-up
- Self serve automotation to save labor
- Convenience
- Food safety

PUC integrates with your own POS software and includes
- Front of cabinet interactive screen shows customer's name and location of their order for pick-up
- Enter PIN or scan QR code; the screen displays location of order and the door unlocks that location
- Back of cabinet interactive monitor for indicating available slots and loading completed orders
 (Option on pass-thru cabinets)

Data collection and analytics

Packages come in various customizable options
- Average time to complete orders
- Average time from order completion to placement in the cabinet
- Average time from cabinet loading to customer pick up
- Total average time from order start to pick up
- Fastest order
- Slowest order

Perfect solutions for carry-out programs or returns!
- QSR and Fast Casual
- Restaurant "to go" programs
- Retail - Deposit boxes
- Supermarkets
- Coffee Shops
